

MARKETING IMPACT REPORT

Amazon SEO Performance & Publishing Marketing Case Study

Prepared for: Roy

Date: August 20, 2026

Prepared by: Brian

PURPOSE OF THIS REPORT

To document measurable Amazon SEO and visibility improvements achieved on two book listings, demonstrate the marketing capability behind those results, and provide a practical basis for beginning a low-cost marketing engagement around the taotimeBooks catalogue.

2	+2 tiers	+45 pts	Apr-Jun 2026
Campaigns documented	Grade improvement per title	Largest single-metric gain	Audit evidence period

Executive statement

The evidence in this report shows that targeted Amazon SEO work can move a book listing from weak audit signals toward materially stronger performance and visibility. Draw Your Adventures moved from Grade E to C, while 20,000 Leagues Under the Sea moved from Grade D to B. The results are not presented as sales guarantees: the supplied evidence measures Amazon-facing SEO, visibility, performance, backlinks and related audit signals. The commercial value is that these results demonstrate a repeatable marketing capability that can be tested on a new catalogue at relatively low initial risk.

For the next step, the recommended approach is a contained marketing pilot on selected taotimeBooks titles before taking on the larger publishing-production work. This creates a controlled test of audience response, establishes a fresh campaign track record, and gives both sides measurable evidence before expanding the engagement.

1. Executive Summary

What was measured. Three dated Amazon audit snapshots were provided for each title. The snapshots show Amazon Grade, Performance, Visibility, Book SEO, VIT and Backlinking.

What changed. For Draw Your Adventures, Performance rose from 23% to 68%, Visibility from 30% to 73%, Book SEO from 19% to 55%, and Backlinking from 12 to 27. For 20,000 Leagues Under the Sea, Performance rose from 50% to 78%, Visibility from 48% to 80%, Book SEO from 41% to 68%, VIT moved from Low to Medium, and Backlinking rose from 39 to 51.

Why it matters for Roy. Roy has correctly identified that distribution and publisher marketing are difficult bottlenecks. A focused digital marketing layer can be tested independently of the publishing decision. The evidence here provides a concrete example of that capability rather than a generic promise.

IMPORTANT INTERPRETATION

These improvements are audit-score and visibility signals. They do not by themselves prove a matching percentage increase in sales. Sales, royalties and conversion should be monitored as separate commercial outcomes during any future pilot.

Campaign evidence at a glance

Title	First Audit	Latest Audit	Grade Change	Performance	Visibility	Book SEO	Backlinking
Draw Your Adventures	E 23% 30% 19%	C 68% 73% 55%	E -> C	23% -> 68%	30% -> 73%	19% -> 55%	12 -> 27
20,000 Leagues Under the Sea	D 50% 48% 41%	B 78% 80% 68%	D -> B	50% -> 78%	48% -> 80%	41% -> 68%	39 -> 51

Source note: values above are transcribed from the six supplied Amazon audit screenshots and the campaign summary provided for this report.

2. Book 1 - Draw Your Adventures

Title: Draw Your Adventures: Making Art to Celebrate Everyday Experiences and Travels Near and Far

Author: Samantha Dion Baker **Format:** Paperback & Kindle **Rating:** 4.7/5 (208 ratings)

USD pricing snapshot supplied for this report

Listing field	USD value
Paperback observed price	\$11.78
List price	\$15.28
Delivery fee	\$16.95
Kindle	\$4.49

Pricing values are reproduced from the supplied campaign brief and are shown here in USD. They are not used in the SEO-performance calculations.

Audit timeline

Date	Grade	Performance	Visibility	Book SEO	VIT	Backlinking
May 13, 2026	E	23%	30%	19%	Medium	12
May 29, 2026	D	41%	54%	48%	Medium	15
June 15, 2026	C	68%	73%	55%	Medium	27

RESULT

The title advanced two Amazon grade tiers (E -> D -> C) across the three documented audits. Performance gained 45 percentage points, Visibility gained 43 points, Book SEO gained 36 points, and Backlinking increased by 15 links as reported by the audit snapshots.

3. Draw Your Adventures - Visual Evidence of Change

Figure 1. Audit-score trend across the three documented snapshots.

Figure 2. First audit versus latest audit.

Interpretation

The strongest movement appears in **Performance (+45 points)** and **Visibility (+43 points)**. Book SEO also moved by +36 points, indicating that the optimization effort improved the listing's audit profile rather than only one isolated metric. The Backlinking signal more than doubled from 12 to 27 in the supplied reports.

For a future catalogue campaign, the practical lesson is that listing optimization should be treated as a **system**: search relevance and metadata, listing presentation, off-page discovery signals, and repeated measurement should be improved

together rather than as one-off edits.

4. Book 2 - 20,000 Leagues Under the Sea

Title: 20,000 Leagues Under the Sea **Author:** Jules Verne **Format:** Kindle, Hardcover, Audiobook **Rating:** 4.4/5 (6K ratings)

USD pricing snapshot supplied for this report

Listing field	USD value
Kindle	\$0.26
Hardcover	\$8.09
Delivery fee	\$15.47
Used & New offers	\$3.23
Audiobook (purchase)	\$8.41
Audiobook (Audible)	Not disclosed

Pricing values are reproduced from the supplied campaign brief and are shown here in USD. They are not used in the SEO-performance calculations.

Audit timeline

Date	Grade	Performance	Visibility	Book SEO	VIT	Backlinking
April 7, 2026	D	50%	48%	41%	Low	39
April 24, 2026	C	64%	61%	43%	Low	40
May 9, 2026	B	78%	80%	68%	Medium	51

RESULT

The title advanced two Amazon grade tiers (D -> C -> B). Performance gained 28 percentage points, Visibility gained 32 points, Book SEO gained 27 points, VIT moved from Low to Medium, and Backlinking increased from 39 to 51.

5. 20,000 Leagues Under the Sea - Visual Evidence of Change

Figure 3. Audit-score trend across the three documented snapshots.

Figure 4. First audit versus latest audit.

Interpretation

This campaign shows a clean progression from D to B. The title crossed the 60% threshold in Visibility by April 24 and reached 80% in the May 9 snapshot. Book SEO rose from 41% to 68%, while the VIT signal improved from Low to Medium.

The important portfolio lesson is not the exact score. It is the demonstrated ability to diagnose a listing, apply optimization, measure the result, and iterate. That process is transferable to a different backlist catalogue, including vintage titles, provided the underlying rights and distribution channels are available.

6. Combined Campaign Impact

Amazon Grade Progression

Draw Your Adventures

E → D → C

20,000 Leagues Under the Sea

D → C → B

Figure 5. Amazon grade progression documented for both titles.

Figure 6. Percentage-point change from the first audit to the latest audit.

Metric	Draw Your Adventures	20,000 Leagues Under the Sea	Combined point change*
Amazon Grade	E -> C	D -> B	2 tiers each
Performance	+45 pts	+28 pts	+73 pts
Visibility	+43 pts	+32 pts	+75 pts
Book SEO	+36 pts	+27 pts	+63 pts
Backlinking	+15	+12	+27

*Combined point change is the arithmetic sum of the percentage-point improvements across the two titles; it is not a weighted performance index or a sales uplift.

What this proves as a marketing case study

- A repeatable audit-and-optimization workflow was applied across two different book listings.
- Both titles improved through sequential measurement rather than a single before/after snapshot.

- The work improved multiple dimensions simultaneously: Performance, Visibility, Book SEO and Backlinking, with VIT improving on the second title.
- The campaign created measurable before/after evidence that can be used as a credible portfolio reference for future authors and publishers.

7. Methodology & Evidence Standard

Evidence set. Six Amazon audit screenshots were supplied for this report: three for each title. Each snapshot visibly records the audit date, test location, browser/tooling, Amazon Grade and the core SEO/visibility indicators.

Audit environment shown in the evidence. Alameda, CA, USA test server; Chrome 142.0.0.0; Lighthouse 12.6.1.

Optimization scope stated in the campaign brief. Amazon SEO optimization, keyword targeting, metadata improvements, backlink building, listing-description enhancement, image optimization and recurring performance tracking.

What is not claimed. The screenshots do not establish a specific number of books sold, revenue generated, advertising return on ad spend, or conversion-rate uplift. Those would require sales or advertising-account data. This report therefore uses the audit metrics strictly as evidence of search/visibility optimization performance.

WHY THIS MATTERS FOR ROY

The strongest proposition is not 'I can guarantee a publisher.' It is 'I can create measurable audience and discoverability improvements first, then use the evidence to support the publishing case.' That is a lower-risk sequence for a catalogue that needs testing before a larger commitment.

Recommended future measurement dashboard

Layer	Metrics to track
Amazon discovery	Keyword rank, search visibility, category/rank movement, listing audit score
Audience	Clicks, video views, saves/shares, profile visits, email sign-ups
Commercial	Units sold, royalties, conversion rate, revenue per title
Campaign efficiency	Spend, cost per click, cost per sale, return on ad spend where applicable

8. Recommended Low-Cost Marketing Start for Roy

RECOMMENDED SEQUENCE

Start with marketing and audience development on selected existing taotimeBooks titles. Keep the first engagement small and measurable. Use the results to decide which title should receive the next level of production, digitization and launch work.

Phase 1 - Marketing pilot

Commercial structure: a modest fixed marketing fee agreed before work begins. The fee pays for a defined promotional service, not for ownership of the books and not as a commitment to publish any title.

- Select 1-3 existing taotimeBooks titles with the clearest availability and audience fit.
- Create a focused digital campaign around the chosen titles: content, short-form promotional assets, audience targeting and discovery-focused optimization.
- Track response using a simple dashboard so that progress is visible and measurable.
- Document the strongest creative angles, audiences and channels for the next stage.

Phase 2 - Publishing project

Trigger: move into the unpublished titles once Phase 1 provides enough evidence that a title, audience or market angle is worth expanding.

- Digitize and prepare *The Inferior Decorator* and *Manuelo's Concert* from the source files.
- Format print and ebook editions for the distribution model already used by taotimeBooks.
- Launch the title with coordinated audience-building rather than treating publication as the end of the process.
- Use documented campaign results as supporting evidence in later publisher or licensing outreach.
- Handle any publisher/licensing opportunity under a separate commercial agreement, with terms agreed before the opportunity is pursued.

Why the marketing-first approach fits the current situation

Constraint Roy identified	Marketing-first response
Limited funds for a speculative publishing search	Keep the first engagement small and tied to a defined marketing deliverable.
Limited time for production	Delay heavy digitization until the campaign identifies where the opportunity is strongest.
Older catalogue has uncertain modern audience	Test real audience response before spending heavily on production.
Traditional publishers control marketing after acquisition	Build discoverability evidence first so the title arrives with a clearer audience case.
Existing taotimeBooks infrastructure already works	Use the existing catalogue and distribution model as the first test environment.

THE COMMERCIAL LOGIC

The immediate objective is not to promise that an old children's title will suddenly become a viral TikTok property. The objective is to prove which stories, visuals and audiences can generate attention, then turn that evidence into sales, repeatable marketing assets, and a stronger case for distribution or publishing support.

9. Portfolio Evidence & Working Proposal

This report can be shared with Roy as a direct proof-of-work document. It demonstrates actual campaign evidence, a transparent interpretation of the results, and a practical next step that matches the financial constraints he has already described.

Recommended opening engagement. Begin with a modestly priced marketing campaign on selected existing taotimeBooks titles. The campaign should be tightly scoped, measured, and completed before any major publishing-production commitment is made.

Recommended objective. Create measurable awareness, discoverability and audience response around the catalogue, while establishing a stronger base of evidence for the later launch of *The Inferior Decorator*, *Manuelo's Concert*, *Star Baby and the Idea*, or appropriate vintage Don Freeman titles where rights and publisher relationships permit.

POSITIONING FOR ROY

The proposal is intentionally practical: start small, demonstrate value, measure the response, and only then expand. This keeps the financial commitment controlled while giving the catalogue a real chance to build an audience before larger publishing or distribution decisions are made.
